

Labour Force Statistics ♦ June 2009

(All labour force statistics are seasonally adjusted, unless otherwise indicated)

Unemployment rate jumps to 8.1% in June

British Columbia's unemployment rate shot up to 8.1% in June as a combination of job losses (-0.2%) and labour force expansion (+0.4%) put upward pressure on the province's jobless rate. Employment in BC shrank by 4,100 jobs in June, putting the brakes on employment growth after back-to-back gains in April and May.

Since September the province has lost 68,000 jobs with most of the loss (48,600) occurring outside the major metropolitan areas of Vancouver, Victoria, and Abbotsford.

Despite its rapid rise in recent months BC's jobless rate remains below the national average

BC Stats

Despite the fact that BC's unemployment rate settled above the 8% mark for the first time since September 2003, the province's jobless rate continues to lie below the national average (8.6%),

well below rates posted in the Central and Atlantic Provinces.

Job losses in the service sector

Following a significant increase in employment in the previous month, the service sector trimmed its workforce by 4,000 jobs (-0.2%), accounting for almost all job losses in the province in June. Gains were made in information, culture & recreation (+8.3%), finance, insurance & real estate (+2.2%) and health care & social assistance (+0.9%). However, these were not enough to offset cuts in management & administration (-7.1%), public administration (-5.3%) and transportation & warehousing (-4.1%). Bucking the trend in the two previous months, employment in retail and wholesale trade slid lower (-0.4%) in June.

Job losses in forestry, fishing & mining contrast against recent employment gains in agriculture

BC Stats

Job losses continued to plague the forestry, fishing & mining sector as employment fell 3.4% in June.

Since June 2008, the number of people employed in forestry, fishing & mining has fallen by 14.0% to just 37,400, a level not seen since 2005. Putting things into perspective, historically the industry has employed nearly 60,000 people. However, since 2000, jobs in forestry, fishing & mining have steadily dwindled to their current levels. Conversely, employment has recently increased in agriculture, rising 7.5% in June. In recent years, as employment in forestry, fishing and mining continues to wane, agriculture's relative importance as an employer among primary industries has increased. If the current trend holds it is likely that agriculture will pass forestry, fishing and mining as BC's largest primary industry employer.

Self-employment rising

BC Stats

While the number of employees (private & public sector jobs) fell by 21,100, some 17,100 people

became their own boss in June, an increase of 4.0% from the previous month. Indeed, over the course of the second quarter, while the number of employees inched lower (-0.1%), self-employment has risen slightly (+0.5%).

Job losses in every region

For the third straight month, job losses were registered in all regions of the province in June as several regions post unemployment rates above or near double-digit levels. Compared to the same month in the previous year, North Coast/Nechako (-10.4%; *three-month moving average*), Cariboo (-9.9%) and Thompson/Okanagan (-7.8%) posted the largest job losses. Kootenay, which had a near record low unemployment rate of 2.5% in June 2008, has also seen its jobless rate climb (8.7%), largely the result of ongoing expansion of the region's labour force.

Vancouver Island/Coast has registered deeper employment cuts in each of the past three months, shedding 3.1% of its workers. For the time being, however, Vancouver Island/Coast has the lowest unemployment rate in the province at 6.6%, a position recently held by Northeast which saw employment drop another 5.9%. Continued job losses in Mainland/Southwest have pushed the region's unemployment rate to 7.3%.

The Nation

Canada's unemployment rate rose to 8.6% as a result of an increase in the country's labour force. Employment remained virtually unchanged as gains in part-time employment offset cuts in full-time jobs, particularly in Ontario where the unemployment rate reached a fifteen year high 9.6%. Newfoundland and Labrador was the only province to see employment increase (+1.2%).

Selected Statistics	Jun-09	May-09	Jun-08

NOTES: 1. Occupation specific Unemployment Rates include only those unemployed who worked in the past year. The "All Occupations" rate incorporates total unemployed persons which includes an "Occupation Unclassified" category.

2. Due to the relatively small sample sizes from which disaggregated data are derived, caution should be used in the interpretation of month-to-month changes in the estimates.

This report is based on statistics from the Labour Force Survey produced monthly by Statistics Canada. Questions and comments should be directed to Data Services at (250)387-0327 or write to BC.Stats@gov.bc.ca

Definitions and Explanatory Notes

Reference Week

Monthly estimates of employment, unemployment, and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Labour Force

The labour force is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed

Employed persons are those who, during the reference week, either: (a) did any work at all, or (b) had a job but were not at work due to own illness or disability, personal or family responsibilities, bad weather, labour dispute, vacation, or other reason not specified above (excluding persons whose job attachment was to a job to start at a definite date in the future).

Unemployment

Unemployed persons are those who, during the reference week, either: (a) were without work, had actively looked for work in the past four weeks (ending with the reference week), and were available for work; or (b) had not actively looked for work in the past four weeks but had been on layoff and were available for work; or (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate

The participation rate represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force for that group expressed as a percentage of the population for that group.

Employment Rate

The employment rate (employment/population ratio) is the number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, etc.) is the employment for that group expressed as a percentage of the population for that group.

Rounding

Estimates published by the Labour Force Survey are rounded to the nearest thousand but all derived values (totals, averages, rates, ratios, percent changes etc.) are calculated from unrounded figures. Therefore, the sum of the individual rounded items may not equal the total. Unadjusted estimates rounded to hundreds are available from BC Stats on request.

Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods, and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.
